Subject: Draft Rule Package

DEQ has posted the most recent draft versions of the rule package (October 2013) on the Nutrient Work Group website. Included are the rules, Circular DEQ-12, the guidance document, and the spreadsheet for calculating public-sector individual variances. The documents were updated to include changes pursuant to the October 16th meeting (new severability clause, for example). The previous drafts (April 2013) are still posted as well for comparative purposes.
